AI Summary

This report contains 12 laboratory parameters. 4 values are within the normal range. However, 8 parameter(s) show abnormalities: Hematocrit is critical low, MCV is low, MCH is low, MCHC is low, RDW is low. Some values are significantly outside normal ranges. Please consult your healthcare provider promptly for proper evaluation.

Key Findings

- CRITICAL: Hematocrit is 2.0 % (Normal: 36.0 - 54.0 %) — Critical Low
- MCV: 73.7 fL — Low
- MCH: 23.4 pg — Low
- MCHC: 31.8 g/dL — Low
- RDW: 6.0 % — Low
- Neutrophils: 23.5 % — Low
- Lymphocytes: 60.6 % — High
- Eosinophils: 6.5 % — High

Complete Parameter Analysis

#	Test Name	Value	Normal Range	Status
1	Platelet Count	248.0 ×10 ³ /μL	150.0 - 400.0 ×10 ³ /μL	Normal
2	Hematocrit	2.0 %	36.0 - 54.0 %	Critical Low
3	MCV	73.7 fL	80.0 - 100.0 fL	Low
4	MCH	23.4 pg	27.0 - 33.0 pg	Low
5	MCHC	31.8 g/dL	32.0 - 36.0 g/dL	Low
6	RDW	6.0 %	11.5 - 14.5 %	Low
7	Neutrophils	23.5 %	40.0 - 70.0 %	Low
8	Lymphocytes	60.6 %	20.0 - 45.0 %	High
9	Monocytes	8.6 %	2.0 - 10.0 %	Normal
10	Eosinophils	6.5 %	1.0 - 6.0 %	High

#	Test Name	Value	Normal Range	Status
11	Basophils	0.8 %	0.0 - 2.0 %	Normal
12	LDL Cholesterol	12.5 mg/dL	0.0 - 100.0 mg/dL	Normal

Detailed Explanations

Hematocrit — Critical Low

Value: 2.0 % | Normal Range: 36.0 - 54.0 %

Your Hematocrit is CRITICALLY below normal and may require urgent medical attention. Please consult your healthcare provider immediately.

Possible Causes: Severe deficiency, Acute medical condition

Health Implications: Urgent medical evaluation recommended, Potential health emergency

MCV — Low

Value: 73.7 fL | Normal Range: 80.0 - 100.0 fL

Your MCV is below the normal reference range. Low values may indicate a deficiency or underlying condition. Please consult your healthcare provider for proper evaluation.

Possible Causes: Nutritional deficiency, Underlying medical condition

Health Implications: May require further investigation, Follow-up recommended

MCH — Low

Value: 23.4 pg | Normal Range: 27.0 - 33.0 pg

Your MCH is below the normal reference range. Low values may indicate a deficiency or underlying condition. Please consult your healthcare provider for proper evaluation.

Possible Causes: Nutritional deficiency, Underlying medical condition

Health Implications: May require further investigation, Follow-up recommended

MCHC — Low

Value: 31.8 g/dL | Normal Range: 32.0 - 36.0 g/dL

Your MCHC is below the normal reference range. Low values may indicate a deficiency or underlying condition. Please consult your healthcare provider for proper evaluation.

Possible Causes: Nutritional deficiency, Underlying medical condition

Health Implications: May require further investigation, Follow-up recommended

RDW — Low

Value: 6.0 % | Normal Range: 11.5 - 14.5 %

Your RDW is below the normal reference range. Low values may indicate a deficiency or underlying condition. Please consult your healthcare provider for proper evaluation.

Possible Causes: Nutritional deficiency, Underlying medical condition

Health Implications: May require further investigation, Follow-up recommended

Neutrophils — Low

Value: 23.5 % | Normal Range: 40.0 - 70.0 %

Your Neutrophils is below the normal reference range. Low values may indicate a deficiency or underlying condition. Please consult your healthcare provider for proper evaluation.

Possible Causes: Nutritional deficiency, Underlying medical condition

Health Implications: May require further investigation, Follow-up recommended

Lymphocytes — High

Value: 60.6 % | Normal Range: 20.0 - 45.0 %

Your Lymphocytes is above the normal reference range. Elevated values may indicate stress on a particular organ or system. Please consult your healthcare provider for proper evaluation.

Possible Causes: Dietary factors, Underlying medical condition

Health Implications: May require lifestyle changes, Follow-up recommended

Eosinophils — High

Value: 6.5 % | Normal Range: 1.0 - 6.0 %

Your Eosinophils is above the normal reference range. Elevated values may indicate stress on a particular organ or system. Please consult your healthcare provider for proper evaluation.

Possible Causes: Dietary factors, Underlying medical condition

Health Implications: May require lifestyle changes, Follow-up recommended

Recommendations

- 1. Stay well hydrated — drink 8-10 glasses of water daily
- 2. Eat a balanced diet rich in fruits, vegetables, and whole grains
- 3. Exercise regularly — aim for at least 30 minutes of moderate activity daily
- 4. Get adequate sleep — 7-8 hours per night
- 5. Reduce excess salt, sugar, and processed foods
- 6. Avoid smoking and excessive alcohol consumption
- 7. Follow up with your healthcare provider to discuss these results
